

Making compliance easy with a range of accredited courses for your dental practice

- CPR/AED and Medical Emergencies
- Dental Immediate Life Support
- Infection Control
- Safeguarding
- Mental Capacity
- Fire Safety
- Health and Safety

Training is led by paramedics and health and safety professionals with extensive experience in their chosen field

Enhanced CPD certificates issued for all courses

All courses comply with Resuscitation Council (UK) and CQC guidelines

“This will be the third time we will be repeating the BLS training with Safe & Sound.

The course is streets ahead of their competitors. ”

Michael Korb
Dental Health Centre
London

“The approach to CPD is not a one-size-fits-all for professionals but needs to be tailored to the individual needs of your role, work, setting and your patients” The GDC

Benefits of our On-site Practical Training for the Whole Dental Team

- **Customised Training**

With onsite training, our instructors can familiarise themselves with your setting and gain insight into how they can apply the training to the scenarios that the dental team deal with on a daily basis

- **Team Building**

Maintaining a safe and compliant dental practice involves teamwork. Whole Practice training encourages greater team co-operation, awareness and understanding of each other's roles and responsibilities

- **Time and Convenience**

Choosing on-site training means you get the training you need at a time convenient for your team. Our training is available nationwide from 08.00-21.00 including Saturdays and evenings

- **Cost-effective**

With any training, you want to provide the best educational experience at the greatest value for money. Our on-site core training days covering up to 3 CPD topics offer huge savings compared to sending staff to open courses and are often no more expensive than online learning

“Dentists must complete 100 hours of verifiable CPD over a five year cycle.” The GDC

Our on-site training provides your dental team with the practical, relevant training you need to operate safely and to comply with Enhanced CPD from the GDC.

COURSES WE OFFER INCLUDE

CPR and Medical Emergencies

This practical, hands on training session led by a qualified medic covers everything you need to know to manage a medical emergency at your dental practice.

The GDC recommends that you do at least 2 hours of this type of CPD activity every year.

Dental Immediate Life Support

The CQC states that all members of the team providing conscious sedation *“must undergo a minimum of 12 hours of continuing professional development every 5 years that are relevant to the sedation techniques practised”*. Our comprehensive course is linked to the Standards for Conscious Sedation in the Provision of Dental Care 2015 and includes both adult and paediatric ILS.

Infection Control - Disinfection and Decontamination

This practical course has been designed to ensure compliance with HTM01-05, providing you with the skills and knowledge to implement effective measures of decontamination and infection control in dental practices.

The GDC recommends that you do at least 5 hours of this in each CPD cycle.

Safeguarding Children, Young People and Vulnerable Adults – including Mental Capacity

The GDC states that *“regularly refreshing your knowledge and skills in these areas contributes to improved performance and patient safety.”* Our Level 2 and 3 Safeguarding courses teach members of the dental team to identify signs of abuse, to understand their ethical responsibility and to inform them of reporting procedures.

Fire Safety Training

When the CQC inspects, they ask providers and staff about fire safety, and may check records of staff training and drills. Our practical Fire Safety and Fire Marshal courses include a walk round your Practice looking at any potential fire hazards plus live extinguisher training, if required.

safe+ sound

Trusted Training to Give You Peace of Mind

Safe and Sound has been providing accredited training for over 20 years.

Our team of qualified paramedics, nurses, firefighters and health and safety experts share our passion for providing healthcare professionals with the skills and knowledge to keep people safe.

In addition to their teaching qualifications, they are highly qualified and experienced professionals in their chosen field of expertise.

“ I thought the training was excellent. The best I have attended by a long way.

That man really knows his subject and how to teach it. ”
